PROFILE SUMMARY

Motivated Computer Science Engineering undergraduate with hands-on experience in Artificial Intelligence, Software-Defined Networking (SDN), and full-stack web development. Worked on AI-driven data privacy solutions, machine learning-based restoration systems, and QoS-aware SDN traffic management using OpenFlow, Ryu, and Mininet. Skilled in Java, C++, MongoDB, REST APIs, and cloud fundamentals, with practical exposure to Linux, Git, and virtualization. Seeking an internship opportunity to apply software development, networking, and AI skills in real-world industry projects.

EDUCATION

KLE Technological University, Belagavi Bachelor of Engineering (B.E), Computer Science Engineering CGPA: 7.32/10	2023–2027
SRA PU Collage, Banahatti Pre-University Course (PUC) – Science Stream Percentage: 84%	2021–2023
PornaPrajnya Kannada Mediam High School, Rampur Secondary School Leaving Certificate (SSLC) Percentage: 92%	2021

TECHNICAL SKILLS

- **Programming Languages:** C
- **Web Technologies:** HTML5, CSS
- **Databases:** MongoDB, SQL
- **Core Areas:** DBMS, Computer Networks, OOPS, DSA
- **Cloud & DevOps (Fundamentals):** Cloud Computing Basics, Virtualization, Linux
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Cisco Packet Tracer

PROJECTS

- **Diabetes Prediction System**
Diabetes Prediction System. Developed a machine learning model to predict diabetes using healthcare datasets with data analysis and visualization using Python..
- **Early Detection of Lumpy Skin disease in Cattles**
Built a deep learning-based web application for early detection of Lumpy Skin Disease in cattle using the Xception model. Developed a real-time image prediction system that detects disease from uploaded cattle images through a user-friendly web interface.
- **Intelligent Pose Estimation–Driven Smart Gym System for Real-Time Exercise Form Correction and Performance Analytics**
Developing an AI-based smart gym system that performs real-time human posture detection and exercise form correction using deep learning and computer vision techniques. Implemented pose estimation to track body landmarks during workouts and provide instant feedback on incorrect exercise posture to prevent injuries and improve performance. Integrated repetition counting, performance analytics, and IoT-based monitoring with a real-time dashboard for user tracking and fitness analysis. (6th Semester)

CERTIFICATIONS

- Springboard Certification on Devops
- Springboard Certification on Computer Network2
- NPTEL Certification on Machine Learning

ACHIEVEMENTS

- Published Research Paper on Early Detection of Lumpy Skin Disease in Cattles using Machine Learning and Deep Learning Techniques
- Developed Multiple AI-Based Projects in Machine Learning and Deep Learning
- Worked on Networking Domain Projects with hands-on experience in networking concepts and tools
